Today, many scientists in different disciplines realize the power of graphics, but are also bewildered by the numerous graphics tools. More often than not, they choose the improper software tools and end up with unsatisfactory results. This book introduces and categorizes the most commonly used graphics tools and their applications. The purpose is not to provide an exhausting list of tools and their explicit functions, but rather to provide scientific researchers with different means and application areas in computer graphics, so as to help them efficiently use visualization, modeling, simulation, and virtual reality to complement their research needs. This guide includes coverage of the most widely used commercial software, freeware and open-source software.

This is the 2nd Edition of this book. The first, published in 2009, won a Readers Favorite Silver Medal for Non-Fiction. Since then many new software tools for enhancing presentation visual aids have been introduced and are discussed herein. Regardless of your profession, e.g., business, science, engineering or government, communicating in front of others is useful and becomes even more of a necessity as one progresses in an organization. Many topics are presented herein such as: Ancient human versions of Facebook and Twitter, the Evolution of Verbal & Written Communication, Factors to Consider Before Designing a Presentation, Winning Over an Audience, Opening & Closing Techniques, Developing Each Part of Your Speech, Taking the Terror out of Public Speaking, Deadly Mistakes to Avoid, Pros & Cons of Using Visual Aids, How to Avoid "Brain Death" When Speaking and much more. Many vital speaking tips are also presented such as: the use of humor; awareness of the role your eyes

and gestures play; verbal & body language; strong words to use & weak words to avoid; speaking speed & pauses; strategies for handling hostile questions & audience members; "security blankets" to avoid and even tips for making a presentation to your boss and management. On-the-job presentations are emphasized such as those within corporations and other organizational entities, business and technical conferences, symposia and scientific poster sessions. The public speaking strategies and tips are described in a straightforward and easy-to-follow manner. The author uses his extensive education, 35 years of management consulting and executive management experience, as well as research on public speaking to present a useful guide for presentations in any setting. As William Hewlett, Co-founder of the Hewlett Packard Corporation said: "How can I trust someone to manage multi-million dollar projects if he or she can't manage a half-hour speech?"
