The year 2019 was marked by growing insecurity in Mali; especially in the Center and North of the country. Tens of thousands of children and their families have had to leave their land to relocate to more stable communities. To this, we can add climatic factors, which increase the fragility of the country. The continuous deterioration of the humanitarian situation and the intensification of ...

Over the past seventy years, World Vision has grown from a small missionary agency to the largest Christian humanitarian organization in the world, with 40,000 employees, offices in nearly one hundred countries, and an annual budget of over \$2 billion. While founder Bob Pierce was an evangelist with street smarts, the most recent World Vision U.S. presidents move with ease between megachurches, the boardrooms of Fortune 500 companies, and the corridors of Capitol Hill. Though the organization has remained decidedly Christian, it has earned the reputation as an elite international nongovernmental organization managed efficiently by professional experts fluent in the language of both marketing and development. *God's Internationalists* is the first comprehensive study of World Vision—or any such religious humanitarian agency. In chronicling the organization's transformation from 1950 to the present, David P. King approaches World Vision as a lens through which to explore shifts within post-World War II American evangelicalism as well as the complexities of faith-based humanitarianism. Chronicling the evolution of World Vision's practices, theology, rhetoric, and organizational structure, King demonstrates how the organization rearticulated and retained its Christian identity even as it expanded beyond a narrow American evangelical subculture. King's pairing of American evangelicals' interactions abroad with their own evolving identity at home reframes the traditional narrative of modern American evangelicalism while also providing the historical context for the current explosion of evangelical interest in global social engagement. By examining these patterns of change, *God's Internationalists* offers a distinctive angle on the history of religious humanitarianism.

In 1974 nearly 3,000 evangelicals from 150 nations met at the Lausanne Congress on World Evangelization. Amidst this cosmopolitan setting and in front of the most important white evangelical leaders of the United States members of the Latin American Theological Fraternity spoke out against the American Church. Fiery speeches by Ecuadorian René Padilla and Peruvian Samuel Escobar revealed a global weariness with what they described as an American style of coldly efficient mission wedded to a myopic, right-leaning politics. Their bold critiques electrified Christians from around the world. The dramatic growth of Christianity around the world in the last century has shifted the balance of power within the faith away from traditional strongholds in Europe and the United States. To be sure, evangelical populists who voted for Donald Trump have resisted certain global pressures, and Western missionaries have carried Christian Americanism abroad. But the line of influence has also run the other way. David R. Swartz demonstrates that evangelicals in the Global South spoke back to American evangelicals on matters of race, imperialism, theology, sexuality, and social justice. From the left, they pushed for racial egalitarianism, ecumenism, and more substantial development efforts. From the right, they advocated for a conservative sexual ethic grounded in postcolonial logic. As Christian immigration to the United States burgeoned in the wake of the Immigration Act of 1965, global evangelicals forced many American Christians to think more critically about their own assumptions. The United States is just one node of a sprawling global network that includes Korea, India, Switzerland, the Philippines, Guatemala, Uganda, and Thailand. Telling stories of resistance, accommodation, and cooperation, Swartz shows that evangelical networks not only go out to, but also come from, the ends of the earth.

This book reviews the remarkable growth, diversity and challenges of child sponsorship. It features the latest progress in child sponsorship practice and necessary tensions experienced by some organisations as they seek to maximise impact.

The global humanitarian movement, which originated within Western religious organizations in the early nineteenth century, has been of most important forces in world politics in advancing both human rights and human welfare. While the religious groups that founded the movement originally focused on conversion, in time more secular concerns came to dominate. By the end of the nineteenth century, increasingly professionalized yet nominally religious organization

Read Book Annual Report Wvi

shifted from reliance on the good book to the public health manual. Over the course of the twentieth century, the secularization of humanitarianism only increased, and by the 1970s the movement's religious inspiration, generally speaking, was marginal to its agenda. However, beginning in the 1980s, religiously inspired humanitarian movements experienced a major revival, and today they are virtual equals of their secular brethren. From church-sponsored AIDS prevention campaigns in Africa to Muslim charity efforts in flood-stricken Pakistan to Hindu charities in India, religious groups have altered the character of the global humanitarian movement. Moreover, even secular groups now gesture toward religious inspiration in their work. Clearly, the broad, inexorable march toward secularism predicted by so many Westerners has halted, which is especially intriguing with regard to humanitarianism. Not only was it a highly secularized movement just forty years ago, but its principles were based on those we associate with "rational" modernity: cosmopolitan one-worldism and material (as opposed to spiritual) progress. How and why did this happen, and what does it mean for humanitarianism writ large? That is the question that the eminent scholars Michael Barnett and Janice Stein pose in *Sacred Aid*, and for answers they have gathered chapters from leading scholars that focus on the relationship between secularism and religion in contemporary humanitarianism throughout the developing world. Collectively, the chapters in this volume comprise an original and authoritative account of religion has reshaped the global humanitarian movement in recent times.

This book includes selected papers presented at the international expert forum on "Mainstreaming Resilience and Disaster Risk Reduction in Education," held at the Asian Institute of Technology, Thailand on 1-2 December 2017. The journey towards disaster risk reduction and resilience requires the participation of a wide array of stakeholders ranging from academics to policymakers, to disaster managers. Given the multifaceted and interdependent nature of disasters, disaster risk reduction and resilience require a multidisciplinary problem-solving approach and evidence-based techniques from the natural, social, engineering, and other relevant sciences. Traditionally, hazard and disaster-related studies have been dominated by the engineering and social science fields. In this regard, the main purpose of this book is to capture the multidisciplinary and multisectoral nature of disaster risk reduction, and to gather existing data, research, conceptual work, and practical cases regarding risk reduction and its ties to sustainable development under a single "umbrella." Along with the sustainability aspect, the book also links disaster risk reduction with development, technology, governance, education, and climate change, and includes discussions on challenges, solutions, and best practices in the mainstreaming of disaster risk reduction.

Lance and Jenn believe Christ-centered microfinance is THE most effective and efficient way to help kids—period—and they provide this evidence within \$4.83. With \$4.83, you could buy a large coffee, grab

Read Book Annual Report Wvi

a medium-sized movie theater popcorn, or even pay for thirty minutes of big city downtown parking. But with that same \$4.83, through Christ-centered microfinance, you could impact the life of a child for one year—maybe forever. The evidence is overwhelming: when parents are given opportunities, the lives of their kids improve. Parent(s) + Opportunity = Kids Win. \$4.83: The cost to impact the life of a child for a year....maybe Forever brings together data and real-life stories to highlight 10 areas where kids win through Christ-centered microfinance.
