International Marketing Compact offers a new perspective in teaching international marketing. The authors address issues in a novel way by bringing in cases from advanced and emerging markets. In this connection they also discuss technological requirements of the 21st century and how these developments necessitate a change in looking at international marketing issues. The individual chapters follow the necessary steps to develop and implement projects successfully in the international market place. The knowledge, which is provided for both students and practitioners, is well balanced in terms of theoretical input and managerial application. This is the result of numerous examples presented in this book not only from Europe, but also from other markets throughout the world. The book is addressed to various student groups: those in a bachelor's program studying business, economics and international trade can well use the book to gain a broad and current perspective on trends in international marketing theory and practice. Those in a master's program for business, economics and international trade can use the book as a guide for building a theoretical background for their term projects and the case studies they analyze. Those at the PhD level in the same or similar disciplines can take a compact look at 21st century international marketing. It is also beneficial for international students, for example, for Erasmus students at European universities, who are building a common international marketing background and perspective that they can take back to their studies at their home universities.

As the two most influential and powerful actors in Eurasia the nature of the Turkish-Russian relationship affects the situation in the Black Sea, South Caucasus, Central Asia and Middle East and steers the foreign policy formulations of both regional states and global powers. Examining post-Cold War relations between Eurasia's most prominent actors, this book takes into account regional dynamics and global power struggles and identifies three important stages in Turkish-Russian relations during the period. Using complex interdependency theory the author offers valuable insights into the initial confrontational period and its transition to an atmosphere of compromise, cooperation and the evolution of multi-dimensional partnership. Leadership theory then explains the most recent deterioration in rapport as crises in Syria and Ukraine have placed severe strain on the previously warm bilateral relations.

Multi-volume major reference work bringing together histories of companies that are a leading influence in a particular industry or geographic location. For students, job candidates, business executives, historians and investors.

This volume explores a range of issues that include: mergers waves, roll-up acquisitions, hostile takeovers, M&A experience, and decision-making, corporate governance, and innovation in mergers and acquisitions.

Though any psychoactive substance can be revered or reviled as a drug, as people's cultural norms shift, ultimately its status is determined in law by the state. This publication explores the regulation of drugs alcohol and cannabis to heroin and cocaine and practices such as social drinking and public injecting under political regimes. Drugs are discussed in their geographical contexts: the colonial legacy of cannabis prohibition for bioprospecting in Africa; the veracity of the persistent notion of the narco-state; Turkey's governance of drinking amid civil unrest; and alcohol's place in the neoliberal political economy of Ireland. In addition, drug policies are examined: from problems in managing drug-related litter in the UK to supervised injecting facility provision in Australia; harm reduction in Canada; and the global network of drug policy activists. Place is significant, but porous borders, territorial overlaps and multi-scalar linkages are influential in remaking the world through current challenges to the "war on drugs". This book was originally published as a special issue of Space & Polity.

Before the recent Ukrainian crisis, Russia was one of the main sources of foreign direct investment (FDI) outflow and one of the main targets of FDI inflow in the world. However, the events in the Ukraine, the formation of the Eurasian Economic Union, and China's growing interest in the Russian market and its natural resources have changed the picture completely. This new book brings together an international group of contributors to present a timely and comprehensive analysis of FDI to and from Russia. The book assesses the impact of the changed international political situation on foreign firms operating in Russia, and explores how the new world context has affected Russian investments abroad. The book also considers the future relationship between Russian corporations and the EU and the USA in light of recent events. This book answers an array of key questions including: how have investments from and to Russia developed in the last 100 years; how are Russian businesses spreading to foreign countries through their indirect investments; and how is the Russian Government influencing the investments of Russian businesses abroad? This volume is of great interest to those who study international economics, modern world economy, and FDI, as well as those interested in international investment movements and the changing role of Russia in international business and the global economy.

ÔThis book describes a number of different empirical studies and evaluations of the international brewery industry. This industry has recently undergone two climactic changes within a ten to fifteen year time period. These are a significant industry-wide consolidation of firms and market shares accompanied by the internationalization of what was previously a largely local industry. Understanding the drivers and implications of such abrupt and massive change in the competitive environment of an industry is of great interest to international and strategic management scholars. Most of the bookÕs chapters address this issue, some at the global industry level, some at a regional level, and some at the level of a specific country. Taken together, they comprise an insightful case study of an interesting industry at its most interesting point in time.Ó Ð William G. Egelhoff, Fordham University, US ÔThe individual contributions in this volume paint a varied and rich picture of strategies and rivalries, the role of environments and institutions, leadership and also customer approaches in both global and local brewery industry. Some of the analysed phenomena are more standard to an IB audience, like consolidation, technological development, and shifts in global markets, but they get a specific flavor and color through this industry focus, while other topics definitely seem more specific (like ÔBierstrasseÓ on Mallorca). For readers with good taste.Ó Ð Rian Drogendijk, Uppsala University, Sweden This unique book explores some of the key topics of international business through the context of a global industry, focusing on the challenges brewery companies face as they operate in globalized markets. It examines the strategies of individual firms to develop markets and explores new insights into recent company rivalries, both globally and locally. In addition, it offers detailed analysis of some of the major players in the industry through longitudinal studies. Drawing on a range of perspectives, the contributing authors explore six overarching themes: international market developments and firm performance; host country institutional effects; multi-point competition and rivalries; cross-border M&A integration and subsidiary development; leadership and internationalization; and boundless customer interfaces through such elements as social media and tourism. The Global Brewery Industry will prove insightful for scholars across international business, as well as providing an appealing case study for advanced students. It will be invaluable to those investigating the brewery sector specifically, or working with brewing firms.
