Compressors are used to boost the pressure of the gas and they are the primary equipment of a CNG refueling station for

## Application And (PDF) Design Procedure of Centrifugal Compressors

A compressor is a mechanical device that increases the pressure of a gas by reducing its volume. An air compressor

# Access PDF

## Compressor

is a specific type of gas compressor.

Compressors are

similar to

pumps: both

increase the

pressure on a

fluid and both

can transport

the fluid

through a pipe.

As gases are

compressible,

# Acces PDF Compressor

the compressor  
also reduces the  
volume of a gas.  
Liquids are  
relatively  
incompressible;  
while some can  
be compressed,  
the main action  
of a pump is to  
pressurize and  
transport  
liquids. Many
