Amazon.in: Introduction to DSLR: Electronics

This flash power variable can easily be compensated for in the guide number equation by reducing one of the other variables. For instance, if you're using a flash with a guide number of 100 (at ISO 100) at 1/4 power and photographing a subject 25' away, you will now require an aperture of f/2 (which is 1/4 the original example's given aperture).

The B&H Speedlight Buyer's Guide | B&H Explora

DSLR Buying Guide. DSLRs have grown in popularity over the last several decades as the technological advances make it easy to take pictures regardless of your skill level. Whether you're buying your first camera or upgrading your current model, there are several factors to consider including experience level, body type, and must-have features for creating dynamic photos.

Amazon.co.uk: DSLR Buying Guide: Electronics & Photo

The flash power can be controlled easily based on the flash's intensity and direction. Flash power is measured in half increments and are depicted as full power, half power, quarter power, etc. When buying a new camera flash, it is necessary to check its power, that will signify the amount of light the flash can emit at full power.
