Meteorology is a branch of atmospheric sciences which primarily deals with weather forecasting. Its constituents are atmospheric physics and atmospheric chemistry. The noticeable weather events which are explained using meteorological science are called meteorological phenomenon.

[PDF] Essentials Of Meteorology

Download Full PDF Book ...

Weather, the state of the atmosphere at any particular time and place, is composed of the weather elements—air temperature, air pressure, humidity, clouds, precipitation, visibility, and wind. Climate represents the accumulation of daily and seasonal weather and its extremes over an extended period of time.
