The three most important factors affecting image quality are native resolution, your source material, and the projector's contrast ratio. Currently, Wide XGA (1280 x 800) and HD (1920 x 1080) are the most common home theater projector resolutions. An HD (1920 x 1080) projector has about twice the number of pixels of a Wide XGA projector.

A home theater projector's contrast ratio is an important performance criterion, defined as the difference between the darkest black and brightest highlight the projector can reproduce. Contrast is what gives images dimensionality, makes black look black on darker scenes instead of a washed-out-gray, and makes shadow details and gradations more visible in darker areas of the picture.

~~How to Buy a Home Theater Projector~~

At a minimum, you will want a contrast ratio of 1000:1 for your home theater projector. Resolution: Often, the resolution is conveyed through pixel measurements. Pixels tell you how high your resolution, or image sharpness, can be. For most, a 1080p resolution, which is measured as 1920 x 1080 pixels, is ideal for a home theater projector.

You've probably seen home theaters in the pages of home improvement and technology magazines like Electronic House. You may have even encountered one at the home of a friend or colleague. Perhaps you've stopped at a home electronics store and have seen a home theater there. Have you ever wondered what it takes to create these elegant, high-performing A/V masterpieces? Our Complete Guide to Home Theater Planning will walk you through the process, step by step. As you'll learn, creating a home theater requires carefully planning to get right, some imagination and plenty of time and patience. It's hard work, but the results can be phenomenal--something that pleases every member of your family and adds real value to your house. And here's some really good news: Any room in your house can function admirably as a home theater, as long as you design the space correctly and select and install the A/V equipment carefully. This book discusses the pros and cons of the morphing existing rooms into home theaters, as well as building a space from the ground up. The appropriate types of equipment for each type of space are suggested, and classic mistakes to avoid are divulged. And if being on the cutting edge is important to you, there's a complete chapter dedicated to a discussion about the new audio and video trends that are worth consideration. You can take your theater project a step further by adding features like dimmable lighting, specialty seating, fiber optic "star" ceilings and more. Although these amenities will add to your bottom line, they're an effect way to put your own personal stamp on your theater, making it a space that's uniquely yours. We'll introduce you to some of these unique home theaters--both ones that have been designed and installed entirely by the homeowners themselves and ones that have been created by seasoned home systems professionals. You'll gain loads of advice and gather great inspiration for tackling your own home theater project. Good luck and happy home theater building!
