~~Interface Control Document (ICD) Template~~

2 Examples. Interface Control Document (ICD) is a document that describes the interface (s) to a system or subsystem. It may describe the inputs and outputs of a single system or the interface between two systems or

Get Free Interface

subsystems. It can be very detailed or pretty high level, but the point is to describe all inputs to and outputs from a system.

~~ProjectManagement.co
m-Interface Control
Document (ICD)~~

An ICD is the umbrella document over the system interfaces; examples of what these

Get Free Interface

interface specifications should describe include:
The inputs and outputs of a single system, documented in individual SIRS and HIRS documents, would fall under "The Wikipedia Interface Control Document."
The interface between two systems or subsystems, e.g.

~~Interface Control~~ ~~Document~~

~~Example~~
An interface control document (ICD) is a formalized description of the methods and structures involved in providing input for and receiving output from a specific system. The system that is described by the interface control document can be a

Get Free Interface

software library or a piece of hardware. The document does not have to follow any single format but can be a collection of paragraphs, charts or even just technical drawings of the interface hardware.

~~What Is an Interface Control Document?~~

For example, common interfaces for computer

Get Free Interface

peripherals may include USB, serial, parallel ports, etc; common interfaces for system users may include monitors, keyboards, mice, etc. Interfaces are documented using interface control documents (ICD) that describe the system's interfaces as well as any rules for communicating with them.

~~PMG | Interface Control
-Description~~

~~Example~~
In the example above, if System 1 exists, the owner of the system will have documented these interfaces in a configuration controlled document so others, System 2, can be designed to interface with System 1 per that definition. In this case,

Get Free Interface

System 1 does not know
of System 2's existence.
System 1 has no
requirements to
interface with System 2.

~~Model-based Interface~~

Get Free Interface

Control Documents
(ICD)

For example:

<System1> has an interface with <System2> and <System3>, multiple ICDs can be written describing <System1> to <System2>; <System1> to <System2> - or - a single ICD can include both. In this latter case,

Get Free Interface

each section in this template would be repeated to describe each interface.
