Making Friends with the Menopause: A clear and comforting ...

The menopause is a natural part of ageing that usually occurs between 45 and 55 years of age, as a woman's oestrogen levels decline. In the UK, the average age for a woman to reach the menopause is 51. But around 1 in 100 women experience the menopause before 40 years of age. This is known as premature menopause or premature ovarian insufficiency.

It can also be other menopausal friends, and this is something that does come up. If your other friends who're going through the menopause have maybe not had such a toughest time that you have, then again, they may be less supportive of you. We've had some women who've had friends saying, you know, "What on earth is wrong with you? Just get a grip.

Does menopause affect friendships? | A.Vogel Talks Menopause

My experience of the menopause may have been sudden and unexpected but I believe it's a fair reflection of what many women go through. It's not exactly a taboo subject but it is something that women don't always feel comfortable talking about, and certainly not a lot of men.

Dealing with the menopause...—Sluggo O'Toole

Complementary and alternative treatments, such as herbal remedies and bioidentical ("natural") hormones, aren't recommended for symptoms of the menopause, because it's generally unclear how safe and effective they are. Some remedies can also interact with other medications and cause side effects.

Menopause—Treatment—NHS

Menopause begins in the late 40s or early 50s for most women. It usually lasts for a few years. During this time, at least two-thirds of women experience symptoms of menopause ().These include hot ...
