~~Manual Exposure Definition~~ ~~Photography~~

Manual Exposure is when the photographer manually sets the aperture, ISO and shutter speed all independently of each other in order to adjust exposure. This gives them full creative control over the output of the image. Yes, Manual Exposure can seem somewhat like you are working without a net, but as mentioned, you still do have full use of the viewfinder's meter display.

~~Manual Exposure Definition
Photography — Kora~~

ISO is the exposure setting that I always set first. When you first started as a manual shooter, ISO was mostly about what kind of light you would find at your shooting location. After a while, you found out that there is more to it than just the brightness of the light. It is also a tool for correcting exposure when

Other settings need a bit of help.

~~Intermediate Exposure Guide for Manual Mode Photography~~
Switching to manual mode prevents that from happening. The advantage of manual mode is that once you have determined the optimum exposure settings, you can set the ISO, aperture and shutter speed and keep them the same until the light changes (or you want to alter them for creative reasons). Manual mode works best when the light levels are steady.

~~Using Manual Mode: Exposure Lesson #4~~

Where To Download Manual Exposure Definition

Manual exposure In manual mode, the photographer adjusts the lens aperture and/or shutter speed to achieve the desired exposure. Many photographers choose to control aperture and shutter independently because opening up the aperture increases exposure, but also decreases the depth of field , and a slower shutter increases exposure but also increases the opportunity for motion blur .
