George C. Evan D. Emma F. Aidan P. Elizabeth R. Gary S. Emily T. Evie Z.

MATHCOUNTS, 1420 King St., Alexandria, VA (2020)
 Maths and English are about so much more than just numbers and letters—so, IXL is too! We approach each topic from many angles, offering visual representations, listening exercises, interactive activities and more.

An introduction to capacity for the youngest readers! Math Counts series introduces young readers (grades K-3) to early math concepts. Real-world examples and corresponding photos make math concepts easy to grasp. When things are sorted together, they are called a set. Things that make up a set have something in common.

Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.

Once you start poppin', there's just no stoppin'! Raised buttons pop in on every page of these fun, tactile books so kids can press them as they read along, and learn to count. In this newest addition, kids can pop the buttons as they sing the alphabet and search for all the different eye-spy elements of this hunt-and-find animal alphabet adventure! This adaptation of the popular rhyme, "A My Name is Alice," teaches the alphabet in a whole new way!

Skill Builders are great for the child who needs extra practice, for the accelerated child who enjoys an extra challenge, and for the young learner who is developing basic concepts and readiness skills. High-interest activities use art to encourage children to have fun while learning. Well-paced activities gradually become more difficult as children progress. Includes over 100 activity pages, as well as answer pages where needed. Time, Money, and Measurement is filled with exciting activities and attractive art to inspire students.

Math Monsters is an amusing and enlightening series that introduces young readers to mathematical concepts through the humorous antics of Addison, Mina, Multiplex, Split, and their friends. The books are based on the Math Monsters public television series, developed in cooperation with the National Council of Teachers of Mathematics NCTM and are designed to meet and support NCTM Standards for Pre-K-2 mathematics content and process instruction.

With bears everywhere, a child has to find his special bear before he can sleep.

Bath time turns into math time for Peg and Cat in this tale for early readers. Peg and Cat are in the bath. One, two friends in the bath. Seems like a great time to do some math! Readers can join old friends Peg and Cat as they engage with the concepts of counting and weight and directional terms such as under, over, and across. How many rocks will sink their boat? When Bug and Worm join the fun, how many are in the bath? Short, repetitive lines and gentle addition and subtraction will make a splash with new and early readers.

Text and illustrations of the familiar O-shaped cereal help the reader count to ten and add groups of ten. On board pages.
