Problem Set 4 contains the following problems: Block and Pulley System Velocity Dependent Force Tension in Massive Rotating Rope with Object Tension in Rope Wrapped Around a Rod Drag Force at Low Speeds Two Pulleys, Two Strings and Two Blocks

### Problem Set 4 - MIT OpenCourseWare

To get started, Ask Didit to create a remote psets/ps4 repository for you on github.mit.edu.. Clone the repo. Find the git clone command at the top of your Didit assignment page, copy it entirely, paste it into your terminal, and run it.. Import into Eclipse. See Problem Set 0 for if you need a refresher on how to create, clone, or import your repository.

Problem Set 1, Problem #4 | MIT 14.01SC Principles of Microeconomics

5.73 Problem Set 4 Due Friday, Oct. 29 1. Consider the 2 by 2 Hamiltonian (assume  $H_{11}, H_{12}, H_{22}$  are all real):  
$$H = \frac{1}{2} p^2 + \frac{1}{2} q^2 + \frac{1}{2} H_{11} p^2 + H_{12} p q + \frac{1}{2} H_{22} q^2$$
  
a. Take the trial vector:  $\psi = \sin c \cos c$  where  $c$  is an adjustable parameter. Clearly, this vector is normalized for any choice of  $c$ . Use the variational

Problem 4 The last problem of this p-set is extremely challenging. Only one student figured this problem out. The solution below is based upon the work of Dhruv Rohatgi. Many students realized the relation of Problem 4 with the fundamental Schauder estimate in Lecture 2: Theorem 1.1. For any  $0 < \epsilon < 1$  and  $n \geq 1$ , there exists a constant

Problem 4 - math.mit.edu

Each problem (or part of longer problems) in the homework assignment will be graded according to this scale. Your problem set score will be the sum of all the grades on the individual problems (or parts of problems) in that set. Note that we define 'Good Effort' as completing all sections of a problem and employing sound physical principles.
