Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

This timely book makes accessible to a broad audience the ideas, principles and practicalities of establishing effective social protection in Africa. It focuses on the major shift in strategy for tackling hunger and vulnerability, from emergency responses mainly in the form of food transfers to predictable cash transfers to the chronically poorest social groups. The first part of the book comprises nine theme chapters, covering vulnerability, targeting, delivery, coordination, cost-effectiveness, market impacts, and asset effects, while the second part consists of fifteen social protection case studies. The continuous interplay between these two parts makes for a unique contribution to the contemporary literature on social protection. The book takes a positive and forward looking view regarding the feasibility of achieving successful social transfers to the poorest in Africa; nevertheless, a critical stance is taken where appropriate, and unresolved strategic issues regarding the targeting, coverage and scale of social transfers are highlighted. Social Protection in Africa is an essential read for personnel, advisors and consultants working for aid donors, United Nations agencies, NGOs and governments on social transfer programmes in sub-Saharan African countries. In addition, the book represents a valuable resource for training courses on social protection, and will be vital reading for Masters level students and researchers studying emergency relief, social protection, vulnerability and poverty reduction in low-income countries.

Policy entrepreneurs engage in collaborative action to promote broad societal changes. They distinguish themselves from other political actors through their willingness to promote policy innovations that are new within specific contexts. Policy Entrepreneurship: An Asian Perspective showcases an exciting collection of new research studies. Previous studies of policy entrepreneurship within specific contexts across this vast region have confirmed the explanatory power of the concept, even though the political systems under investigation are distinct from the political system in the United States, where the notion of policy entrepreneurship was coined. This book is the first ever comprehensive compilation of research on policy entrepreneurship in Asia, and focused on policy change in China, India, Indonesia, Singapore and Thailand. All the studies gathered here assess the agency of policy entrepreneurs within broader structures that present them with both opportunities and constraints. In their different ways, each chapter explores how structural changes, specific strategies used by policy entrepreneurs, and the practice of boundary spanning shape policy agendas. The scholarship on display offers an inspiring treasure trove of ideas, insights, concepts, and research strategies. This book will prompt newer scholarship on policy entrepreneurs and the crucial role they play in contemporary politics, in Asia and globally. The chapters in this book were originally published in the Journal of Asian Public Policy.
