SPS 05 (revision 50, that is) and you install revision 51 this is considered as an update. New features are introduced with support package stacks (SPS). To enjoy the new capabilities, you will need to upgrade, for example from SAP HANA 2.0 SPS 04 to the latest SPS 05 release.

Technically, this is the same as an update as we are going from one revision to the next but as we now activate new functionality a bit more planning and testing comes into play.
