In 1885 Herman Ebbinghaus showed the world how the scientific method could be applied to the elusive phenomena of memory. But what of work on memory before Ebbinghaus? The long ascendance of the Ebbinghaus tradition has eclipsed the contributions of scholars before Ebbinghaus. *Memory in Historical Perspective* draws together for the first time a collection of writings that figured prominently in scholarly thought about memory from the 8th century B. C. until the scientific investigation of memory began in the late 19th century. *Memory in Historical Perspective* will be of value to students, researchers, teachers, and writers who wish to place the study of memory in its historical context. The writings are thought-provoking; they deal with a wide range of basic issues in memory in a direct and refreshing way. A study of these writings will stimulate insights into current issues about memory in psychology, philosophy, artificial intelligence, anthropology, and education.

This book discusses the relationship between democracy and the financial order from various legal perspectives. Each of the nine contributions adopts a unique perspective on the legal and political challenges brought to the fore by the Global Financial Crisis. This crisis and the ensuing sovereign debt crisis in Europe are only the latest in a long series of financial crises around the globe in recent decades. By their very existence, but also as a result of the political turmoil they have created, these financial crises testify to the well-known tensions between democracy and a market-based economic and financial order. However, what is missing in this debate is an analysis of the role of law for reconciling democracy with a market-based financial order. To fill this lacuna, the book focuses on the controversy surrounding the concept of law, thereby adding another variable to the debate on the relation between democracy and capitalism. Each chapter addresses the concept of law from a particular theoretical angle, be it a full-grown legal theory or an approach in political economy that has a particular view of the law.

The fact that the World Health Organization has declared tuberculosis a “global emergency” indicates the serious inadequacy of the ways in

which the control methods at our disposal are used. Several books on tuberculosis have been published in recent years, but none have taken a deep and detailed look at the “holistic” aspects of global tuberculosis control, even though international agencies are increasingly aware of the importance of the numerous factors other than the design and efficacy of therapeutic drug regimens. This unique book fills that gap. Although it deals specifically with tuberculosis, the principles outlined and discussed are relevant to many other areas of global medicine, including the ever-growing problem of HIV/AIDS. The book is aimed principally at those involved in the design, establishment and management of disease control programmes at international, national and local levels, and also at a more general readership of epidemiologists, public health officers, community psychologists, and others interested in understanding the human dimension of disease control. Contents: Introduction to Tuberculosis and Its Control: The Global Burden of Tuberculosis (J M Grange) The Politics of Tuberculosis: The Role of Process and Power (G Walt) Public Health and Human Rights: The Ethics of International Public Health Interventions for Tuberculosis (P Pronyk & J Proter) The Current International Structure: Tuberculosis in High-Prevalence Countries — Current Control Strategies and Their Technical and Operational Limitations (K Jochem & J Walley) Involving the Private Medical Sector in Tuberculosis Control: Practical Aspects (M Uplekar) Tuberculosis Treatment from the Patient's Perspective: Social and Economic Dimensions of Treatment-Seeking for Tuberculosis: The Economics of Tuberculosis Diagnosis and Treatment (S Foster) Socio-Cultural Dimensions in Tuberculosis Control (S Rangan & M Uplekar) Gender Issues in the Detection and Treatment of Tuberculosis (P Hudelson) Alternative Approaches and Future Directions: Tuberculosis and Health Sector Reform (E Tayler) Educational Approaches in Tuberculosis Control: Building on the 'Social Paradigm' (T Narayan & R Narayan) and other papers Readership: Epidemiologists, public health officers and community psychologists. Keywords: Tuberculosis; Epidemiology

This volume provides an important update to our current understanding of politics and the internet in a variety of new contexts, both geographically and institutionally. The subject of e-democracy has morphed over the years from speculative and optimistic accounts of a future heightened direct citizen involvement in political decision-making and an increasingly withered state apparatus, to more prosaic investigations of party and governmental website content and micro level analyses of voters' online activities. Rather than levelling the communications and participation playing field, most studies concluded that existing patterns of bias and power distribution were being repeated online, with the one exception of a genuine change in the potential for protest and e-activism. Across all of these accounts, the question remains whether the internet is a levelling communication tool that elevates the profile of marginalised players in the political system, or whether it is a medium that simply reinforces existing power and participatory biases. While employing case studies from various global perspectives, this book investigates the role of digital media and competitive advantage, campaigns and the effect of social media, online communication as way of fomenting nonviolent revolutions and the undeniable and important role of the internet on democracy around the world.
