Covering the basic concepts and principles of Information Technology (IT), this book gives energy managers the knowledge they need to supervise the IT work of a consultant or a vendor. The book provides the necessary information for the energy manager to successfully purchase, install, and operate complex, Web-based energy information and control systems. Filled with comprehensive information, this book addresses the most significant concepts and principles that the typical energy or facility manager might need with emphasis on computer networking, use of facility operation databases, and sharing data using the Web and the TCP/IP communications protocol.

Citizenship, indigenisation, inter-ethnic marriages and youthful exuberance are the core of WHERE ARE YOU FROM?. The novel questions the true meaning of federalism and highlights the frustration and disappointment young Nigerians face in their quest to succeed in a place where there are differences in background. It is an expose on how one can be lost in a country of one

Earl Mills, (Chief Flying Eagle) a sachem of the Cape Cod Mashpee Wampanoag Indians, is a contemporary gourmet chef, who shares with the reader time-tested recipes handed down by his ancestors and perfected at his popular Cape Cod restaurant, The Flume. Homespun narratives and blessings over meals precede Cape Cod recipes ranging from Quahog Chowder to Indian Pudding. This down-home mix of comfort foods and nostalgia offers an invitation to succumb to fond memories, take control of "hearth and soul," and rediscover the passion of good eating. Every recipe in this book has been taste-tested to perfection. Each story and blessing transports to an earlier and more basic lifetime and connects us all through food, the good earth, and our own roots. Mills and Breen show us how to incorporate our best yesterdays into our modern lives, mixing gentle nostalgia with up-to-date tips on food preparation. Recipes include soups and chowders, breads, salads and dressings, pastries, meats, game, seafood, vegetables, pasta, sauces, and desserts.

Explains how to build complex scripting functionality with minimal coding, providing coverage of functions ranging from incorporating Ajax apps and overcoming the limits of HTML and CSS to building plug-ins and using animation. Original.

This book is a most exciting and unusual study of cultural history. The idea of the pregnant man, redolent of bawdy jokes and sexual fantasy, has inspired European literature and folklore since ancient times. Traces of the theme, both comical and disturbing, are found not only in the wealth of tales from Italy, France, Germany, Russia, Finland and other European Countries, but also in the Hebrew and Islamic traditions.

In this important work, Dr. Felipe Fierro offers a comprehensive view on the subject of Introduction to the Study of Law, in which he revives the use of Gnoseology, Philosophy, History and Logic as Auxiliary Sciences; and exposes how the abandonment of such has contributed to the exponential growth of Skepticism and Relativism, currently prevailing in the legal world. The above, through extensive experience in teaching Law from the Aristotelian-Thomistic platform, based on the elementary assumption that we must first prove the existence of the object of study, and contrast main legal branches in topics such as: what is Law?, why is Science?, what are Law, Justice, Facultative rights and the Common Good?; supported by extensive and select bibliography. In addition, the being, nature, concept, essence and properties of the sources, fundamentals and classification are described. But important elements such as knowledge, order, principles, Jurisprudence, and Natural law, fundamental legal concepts, the legislative process, the Constitution, interpretation and others are not absent. Morality and Legal Law are obligatory markers, which although considered in their own field, are not excluded, but different as to object and method. Predominantly, Justice is exposed as one of the great values of the Law, and main theories in order to offer future lawyers the basis regarding the current Science of Law and its significance.

A European public law is under construction, but how has this occurred and what is its character? Stirn proposes that this European public law is being constructed by the convergence of three circles: the law of the European Union, the law of the European Convention on Human Rights, and the different domestic legal orders. The mutually influential relationship of these constituents has allowed them to develop, most considerably in the jurisprudence of the Court of Justice of the European Union and the European Court of Human Rights. The book begins by reflecting on the different phases of the development of the European project from the end of the First World War. It outlines the transition from the European Coal and Steel Community to the European Union, as well as the other institutions contributing to these developments. The discussion then moves to the European legal order, which consists of the law of the European Union and the European Convention on Human Rights. Stirn explores how, in spite of occasional false starts and frictions, their relationship is becoming

ever closer, and how their characteristics in law are becoming increasingly similar. Furthermore, Stirn analyses the relationship between European law and national legal systems. The differing approach to domestic incorporation of international law, whether it be monist or dualist is considered, as well as the recognition that European law is superior to domestic law. The character specifically of EU law, and how it compares to international and domestic law is also discussed, in particular its unique features but also the principles it shares with domestic law. In addition, the book examines the existence or not in member states' of constitutional courts, the level or jurisdictional orders and the recruitment and status of judges. Similar trends across Europe in public administration are also accounted for and subjected to analysis. Stirn concludes that a European model of public administration is becoming apparent.
