Surgical management of low back pain | The Medical Journal

The literature on surgical management for low back pain similarly elicits uncertainties due to non-specific diagnosis, but Glassman et al (2009) showed that with diagnostic specificity and stratification, the outcome of surgery depends on the underlying diagnosis. Functional improvement after surgery is not equal among diagnostic subgroups.

Lumbar decompression surgery is usually only considered if non-surgical treatments for your lower spine haven't worked and symptoms are affecting your quality of life. Non-surgical treatments include painkillers, physiotherapy and spinal injection therapy. Spinal injection therapy is a course of spinal injections that can be used in combination with other therapies, such as physiotherapy.
