The Unfair Commercial Practices Directive 2005/29/EC regulates unfair business practices in EU law, as part of European consumer law. It requires corresponding laws to be passed that incorporate it into each member state's legal system. The Directive is concerned mainly with the "substantive" law. To some extent it leaves to member states the choice of appropriate domestic enforcement procedures and penalties for non-compliance.

The unfair commercial practices directive

The Unfair Trading Practices law is a Directive, and once it has been given formal sign-off (expected in March) it will need to be transposed into the law of each of the 28 Member States within the next two years. What is an unfair trading practice? In the past, the European Commission has defined Unfair Trading Practices (UTPs) as follows:

fundamental issues for debate. This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated. It explains how the Directive fits into the existing acquis. It also examines national traditions where these are necessary to explain the European approach, as in the case of general clauses. The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws. It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation. Businesses and their advisers will use the book as a means of understanding the new regulatory climate post-the directive.

This volume is concerned with explaining the Unfair Commercial Practices Directive, exploring the many ambiguities in its drafting and considering its implications for trading and consumer protection within Europe as well as the relationship between European and national trade practices law.

This book investigates the regime of consumer benchmarks in the Unfair Commercial Practices Directive and explores to what extent this regime meets each of the goals of the Directive. In particular, it assesses whether the consumer benchmarks are suitable in terms of achieving the three goals of the Directive: achieving a high level of consumer protection, increasing the smooth functioning of the internal market, and improving competition in the market as such. In addition to providing a thorough analysis of the consumer benchmarks and their relationship to the goals of the Directive, at a more practical level, the book provides insight into the working and consequences of the benchmarks that can be used in the evaluation of the Unfair Commercial Practices Directive and its application by the CJEU. This assessment is important because the Directive, while promising to regulate unfair commercial practices in a way that achieves the Directive 's goals, has removed the possibility for Member States to

regulate unfair commercial practices themselves.

One of the most important EU consumer protection directives of the past decade, the 2005 Unfair Commercial Practices Directive, or UCPD, is brought under examination in this stimulating volume. Bringing together leading experts in the comparative law and consumer law domain, the book discusses the impact of the Directive and whether the many possible issues identified at its inception have been borne out in practice. Divided into four parts of 'Implementation, Approximation and Harmonization', 'Vulnerability', 'The UCP Directive and Other Regimes', and finally 'Enforcement', the volume examines the various policy developments, the growing body of case law, the decisions of relevant national enforcement authorities, as well as the legislative debates which have surrounded the implementation of the UCPD in Member States. This book provides a valuable assessment of the impact of a major EU directive almost ten years after its adoption, and as such will be of interest to academics, legal practitioners and the judiciary working in the areas of European and Consumer law.

Commercial practices between businesses and consumers within the internal market are benefited today by a uniform set of rules: Council Directive 2005/29/EC ('Commercial Practice Directive' hereinafter'). The Commercial Practices Directive fully harmonises measures seeking to curb unfair commercial practices harmful to the economic interests of consumers. Furthermore, the Commercial Practices Directive pursues the double aim of contributing to the smooth functioning of the internal market, and providing consumers a high level of protection. This paper first outlines the limited scope of the Commercial Practices Directive, its general prohibition, its notion of

misleading and aggressive practice, and its failure to address fully the potential of codes of conduct in the field of unfair commercial practice. Secondly, this paper analyzes the developing notion of an 'average consumer,' and how it will play a pivotal role in the application of the Commercial Practices Directive. Finally, the US experience with fair trade laws is examined with some concluding, remarks on the relationship between the consumer, competition, and unfair practice laws.

This book represents the fruit of a conference held in Oxford on March 3, 2006 under the auspices of the Institute of European and Comparative Law in the Oxford University Law Faculty. Directive 2005/29 is an important new measure in the construction of a legal framework apt to promote an integrated economic space in the European Union. It establishes a harmonised regime governing the control of unfair commercial practices. As such it represents an important exercise in the use of new rules and new techniques, and therefore poses new challenges to EU lawyers. The purpose of this book is to inform and to explore the issues raised by the Directive, issues which are of academic and practical interest, in helping to understand the evolution of European consumer law within the broader programme of European market regulation. The intense practical significance of this Directive, which heralds a new regime, is likely to provoke commercial operators to seek to exploit opportunities to pursue practices previously suppressed.
